MERN Stack Developer with hands-on experience building full-stack web applications. Skilled in React, Node.js, Express.js, REST APIs, JWT authentication, Responsive UI and MongoDB management. I'm eager to bring my problem-solving skills to a real-world development team as an intern and continuously adapt to new technologies.

Core Skills:

- **Frontend:** HTML5, CSS3, Tailwind CSS, JavaScript (ES6+), React.js, Next.js
- **Backend & Database:** Node.js, Express.js, MongoDB
- **Tools & Technologies:** Git & GitHub, REST APIs, JWT, Better Auth, Stripe Payment
- **Languages:** Bangla (Native), English (Professional)

Projects:

Full-Stack Property Rental Platform (MERN Stack)

- [Peyaraful Nest](#) is a modern property rental platform where property owners can list rental properties and tenants can browse, book, and manage rental requests. The platform includes secure authentication, role-based access control, property management, booking workflow, and online payment integration.
- Built with MongoDB, Express.js, React.js, and Node.js, fully responsive UI for mobile, tablet, and desktop, JWT authentication, role-based dashboards, property approval workflow, booking management, Stripe payment integration, and RESTful APIs.
- Server Repository: [peyaraful-nest-server-side repositories](#)
Client Repository: [peyaraful-nest-client-side repositories](#)

Full-Stack Car Rental Platform (MERN Stack)

- [Drive Nest](#) is a full-stack car rental platform where owners can list properties and tenants can browse, book, and manage booking.
- Built with MongoDB, Express.js, React.js, and Node.js with CRUD operations, featuring responsive design, secure authentication, property management, booking system, and event notifying.
- Server side repo : [drive-nest server side repositories](#)
Client side repo : [drive-nest client side repositories](#)

Dynamic Summer Products Web Applications

- [Summer Essential Store](#) is a responsive e-commerce web application where users can explore and purchase summer products, create an account, and manage their profile.
- Built with Next.js, Tailwind CSS, Better Auth, and MongoDB, featuring responsive design, Google and email/password authentication, user profile management, and deployment on Vercel.
- Repo : [summer-essential-store repositories](#)

Highlights:

- Built 3+ full-stack web applications.
- Developed RESTful APIs with Express.js.
- Integrated Stripe Payment Gateway.
- Deployed projects using Vercel.
